Continuation of 2. NOTE: Claim 16 now recites that at least one end portion of the flexible substrate has the external connection terminals and is folded almost in contact with a back surface. Claim 17 now recites that a film-like flexible substrate having a wiring pattern is folded on a front surface. Claim 18 now recites a member and printed wiring substrate below the flexible substrate. These changes require further search and consideration.

Continuation of 5. does NOT place the application in condition for allowance because: The claims as finally rejected were not allowable over the prior art.
